产品介绍： This gene encodes a member of the Kruppel family of zinc finger proteins. Members of this DNA-binding protein family act as transcriptional regulators. This gene is located within a cluster of zinc finger family members. The encoded protein may play a role in spermatogenesis. [provided by RefSeq, Jul 2008]

Function:

May be involved in transcriptional regulation.

Subcellular Location:

Nucleus.

Tissue Specificity:

Expressed specifically in testis.

Similarity:

Belongs to the krueppel C2H2-type zinc-finger protein family.

Contains 6 C2H2-type zinc fingers.

Contains 1 SCAN box domain.
