
Recombinant Human Transferrin (APO)

Catalog Number : mly04504

Characteristics:

Source	Chinese Hamster Ovary cell line
Description	Human Transferrin (Val20-Pro698) Accession # P02787
Predicted molecular mass	75.2 kDa

Specification:

Appearance	White powder, Colorless to light red solution with no opalescence after reconstitution
Purity	≥95%, by SDS-PAGE (under reducing (R) & Non-reducing conditions, visualized by Coomassie staining)
Endotoxin	≤10 EU/mg by the LAL method
Activity	Measured in a serum-free cell proliferation assay using MDCK canine kidney epithelial cells. The ED ₅₀ for this effect is ≤5 µg/mL. Optimal concentration depends on cell type as well as the application or research objectives..
Formulation	Lyophilized from a 0.22 µm filtered solution in sterile water.
Size	50 µg/vial, 1 mg/vial

Handling and Storage:

Reconstitution	It is recommended to redissolve in sterile deionized water.
Shipping	The product is shipped with blue ice.
Storage & Stability	36 months at 2°C to 8°C in lyophilized state 6 months at -20°C to -80°C under sterile conditions after reconstitution 7-10 days at 2°C to 8°C under sterile conditions after reconstitution Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Data:

Bioactivity

Measured in a serum-free cell proliferation assay using MDCK canine kidney epithelial cells. The ED₅₀ for this effect is ≤5 µg/mL. The activity of mly04504 was higher than other competing products.
